# KRANBAU KOETHEN

## A professional partner with international experience

Kranbau Koethen GmbH specialises in special-purpose, process and automatic cranes. The company's site in Koethen is steeped in tradition. At this location, it manufactures modern crane systems (overhead, semi-gantry or full-gantry cranes) tailored exactly to individual customer requirements. We draw on the experience we have gained over 80 years and are one of the leading European crane manufacturers. We are a market leader in quality thanks to the reliability of our crane systems. Kranbau Koethen GmbH offers an extensive portfolio of services including design, manufacturing, assembly and, above all, service. We are always on hand to help our customers. As a one-stop provider, we offer an extensive range of services for fast, competent and reliable support.

## PROCESS CRANES

Customer-specific specialised crane construction

**KRANBAU  
KÖTHEN**

# PROCESS CRANES

## Customer-specific specialised crane construction

Process cranes are manufactured to very exacting standards. In order to meet these requirements, the lifting equipment that we manufacture at our plant in Koethen is tailored exactly to the client's company and its specific needs. Every process crane is manufactured to the highest quality standards. In contrast to standard cranes, a bespoke manufactured crane can be easily and safely integrated into a company's existing process chains.

Quality is monitored using the latest measuring and testing technology and components are all carefully designed to guarantee availability levels of up to 99 percent – our customers benefit from this outstanding safety and cost efficiency.

### Our portfolio includes

- Ladle cranes and charging cranes
- Ladle transport cranes
- Slab transport cranes
- Coil transport cranes
- Gripper cranes
- Forging cranes
- Magnetic traverse cranes
- Specialty cranes, specialty machines
- Automatic cranes
- Repairs/modifications
  - *Modifications (mechanical, electric)*
  - *Increase in load-carrying capacity*

When developing individual solutions and approaches, we draw on our decades of experience in building special-purpose cranes.
